

YOUR BAKERY SOLUTIONS PROVIDER

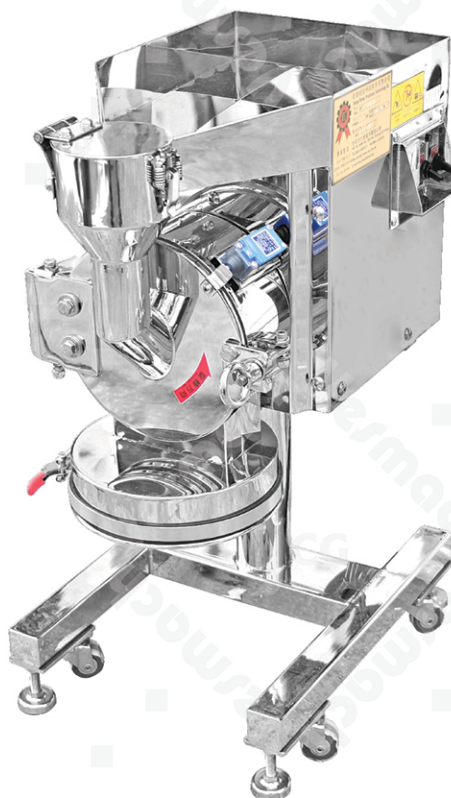

Product Name:

# Horizontal Pulverizing Machine

MODEL: RT10HS

Features:

- Made of stainless steel (SUS304) which reach sanitation standard by polishing treatment.
- Applied for material for example :Ganoderma polysaccharides, sugar, salt, monosodium glutamate, soybeans, and black soy beans...etc.
- The fineness of powder can reach 10~120 mesh based on different characteristics.
- Blade design for disassembly quickly, clean easily, and can avoid cross-contamination.

Advantage:

- The machine is made of SUS 304 with polish process.
- The user can decide the output powder size by changing the filter net from 10mesh to 150mesh.
- Safety design for example power supply is close when pulverizing lid is open.
- Move more easily with wheels.

Purpose:

*This machine is suitable for grinding food and chemical material, like salt, sugar, monosodium glutamate, soy beans, black soy beans, crystal and so on.*

## Specifications

Power	1 HP, 110V Single Phase
Capacity (KG/HR)	5-10
Grind Trough Size (H*D mm)	80*175
Machine Dimension (L*W*H mm)	320*450*650
Weight	42KG
